Subject: Duane Marine next

I spoke with Joe Cosentino last night who informed me he was called by an attorney for the owner of Duane Marine and by ORC on what are we planning for this site.

First of all attorneys should be calling ORC. and on this site, as my last note stated we were waiting for the go ahead from all of you as to what was next for this site.

At this time, we need more data to characterize and define the onsite contamination, in particular PCBs, PAHs, and VOAs. Thus, as soon as you provide access to the site, we would go and sample. We already know that there are receptors and therefore targets for exposure. What we need are the information on the contamination.

THEREFORE WE NEED your input, direction, and access to the site.

Joe Cosentino and I could teleconference with you. the next few would be difficult to do so, because of end of year items, but both of us are here today.
